Nearly 9 in 10 heard “gay” used in a negative way (e.g., “that’s so gay”) and more than 8 in 10 heard other homophobic remarks (e.g., “fag” or “dyke”) at school regularly (i.e., sometimes, often, or frequently; see Figure 1).

More than 8 in 10 regularly heard other students in their school make negative remarks about how someone expressed “feminine” or “masculine” enough (see Figure 1).

6 in 10 regularly heard negative remarks about transgender people (see Figure 1).

Students also heard biased language from school staff. 23% regularly heard school staff make negative remarks about someone’s gender expression and 14% regularly heard staff make homophobic remarks.

The majority experienced verbal harassment (e.g., called names or threatened): more than 7 in 10 based on their sexual orientation and nearly 6 in 10 based on the way they expressed their gender (see Figure 2).

Many also experienced physical harassment and physical assault: for example, nearly 3 in 10 were physically harassed (e.g., pushed or shoved) based on their sexual orientation and more than 1 in 10 were physically assaulted (e.g., punched, kicked, or injured with a weapon) based on the way they expressed their gender (see Figure 2).

Students also reported high levels of other forms of harassment at school: 87% felt deliberately excluded or “left out” by peers; 76% had mean rumors or lies told about them; 64% were sexually harassed; 43% experienced electronic harassment or “cyberbullying”; and 38% had property (e.g., car, clothing, or books) deliberately damaged and/or stolen.

51% of students who were harassed or assaulted in school never reported it to school staff, and 51% never told a family member about the incident. Among students who did report incidents to school authorities, only 42% said that reporting resulted in effective intervention by staff.
FACT: Many LGBT students in Minnesota did not have access to in-school resources and supports.

- Only 14% attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and gender identity/expression (see Figure 3).

- Nearly all could identify at least one school staff member supportive of LGBT students, but fewer (67%) could identify 6 or more supportive school staff (see Figure 3).

- Many did not have LGBT-inclusive curricular resources: only 27% were taught positive representations of LGBT people, history, and events, and nearly half (46%) could not access information about LGBT topics on school Internet (see Figure 3).

RECOMMENDATIONS

School-based supports such as comprehensive anti-bullying/harassment policies, school personnel who are supportive of LGBT students, Gay-Straight Alliances, and LGBT-inclusive curricular resources can positively affect school climate for LGBT students. Findings from the 2013 National School Climate Survey demonstrate that students attending schools with these resources and supports report more positive school experiences, including lower victimization and absenteeism and higher academic achievement.

Given the high percentages of LGBT students in Minnesota who experience harassment at school and the limited access to key resources and supports that can have a positive effect on their school experiences, it is critical that Minnesota school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement comprehensive school anti-bullying/harassment policies;
- Support Gay-Straight Alliances;
- Provide professional development for school staff on LGBT student issues; and
- Increase student access to LGBT-inclusive curricular resources.

These actions can move us toward a future in which all students in Minnesota will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.
