CORONAVIRUS IMPACT: 1 in 4 MN Households Have Applied or Tried to Apply for Unemployment Benefits...

## **Minnesotans Strongly Approve of Governor Tim Walz And State Legislature Handling of Coronavirus, Back Governor's Executive Orders; Strongly Disapprove of President Trump's Handling, Mixed About Congressional Handling of Pandemic:**

4 of 5 Minnesota adults say they approve of the way Governor Tim Walz is handling the Coronavirus, according to this latest exclusive KSTP 5 Eyewitness News Poll conducted by SurveyUSA. 37% today say they strongly approve of the way Walz is handling the virus, 45% somewhat approve; combined, that's 82%. Subtracting out the 14% who disapprove (9% somewhat disapprove, 5% strongly disapprove) leaves Walz with a Plus 68 Net Approval on the virus. Walz's net approval is positive among every demographic group; among Democrats, the DFL Governor is at Plus 84; among Republicans, Walz is at Plus 44. Walz's Net Approval is lowest -- but still positive -- among those who self-identify as very conservative, where he is at Plus 14.

The Minnesota State legislature is similarly well-regarded; 68% approve and 16% disapprove of the way it is handling COVID-19, producing a Net Approval of Plus 52 .

President Donald Trump's handling of the virus earns him a Net Approval of Minus 25 today in Minnesota. 10% strongly approve, 24% somewhat approve, compared to 17% who somewhat disapprove and 42% who strongly disapprove of the way the President is handling the Coronavirus. Trump has a positive Net Approval only among those who identify as very conservative (Plus 74), Republicans (Plus 52), conservatives (Plus 30), and in rural parts of the state (Plus 3.)

The United States Congress has a Coronavirus net approval of Minus 7 . 3% strongly approve of how Congress is handling the virus and 37% somewhat approve, compared to 33% who somewhat disapprove and 14% who strongly disapprove.

SurveyUSA also asked Minnesota adults about Governor Walz's new instructions regarding the virus and calculated Net Agreement with 4 newly issued directives, all of which have broad support:

- \* By Plus 69 , Minnesota agrees with the governor's decision that most Minnesota businesses will be allowed to open, so long as they use curbside pickup, delivery, or drive-thru service.
- \* By Plus 63 , Minnesotans agree with Walz's decision that restaurants and bars will remain closed, continuing to only be able to provide curbside pickup, delivery, or drive-thru service.
- \* By Plus 56 , there is agreement with the extension of "Stay Home MN" executive orders to May 18. Very conservative Minnesotans disagree with this one element by Minus 7.
- \* By Plus 45 , Minnesota adults are in agreement with allowing elective surgeries and ambulatory procedures to take place, but not yet re-opening all healthcare services

58% of Minnesotans say they have received a stimulus payment from the federal government; 39% say they have not.

4% say they or someone in their household have tried to file for unemployment benefits but have not been successful; another 23% say they have filed for benefits. Of those who have applied for benefits, 73% say they have received them.

**About:** SurveyUSA interviewed 500 Minnesota adults 04/30/20 through 05/03/20. This research was conducted online.

**Statement of Methodology:** SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to [editor@surveyusa.com](mailto:editor@surveyusa.com).
