## MN DFL Gov Walz Favorability Rating Dips & But His Leads Against GOP Challengers Widen: Is Leaked SCOTUS Decision Impacting This Contest?

SurveyUSA's latest tracking poll, conducted exclusively for KSTP-TV in Minneapolis, KAAL-TV in Rochester-Mason City-Austin, and WDIO-TV in Duluth, shows Minnesota's incumbent DFL Governor Tim Walz increasing his leads in his November re-election bid, even while facing a simultaneous decline in his net favorability. Meanwhile, the percentage of likely voters who say abortion is the issue that will most influence their vote this year quadruples, from 3% in February to 12% today & those voters overwhelmingly break DFL.

Breaking down all the numbers and comparing them to those in SurveyUSA's previous poll, released three months ago: Walz today leads former State Senator Scott Jensen , his nearest opponent, by a 5-point margin, up from 3 points three months ago, 44% to 39%. Overall, Walz is up 1 point and Jensen is down 1 point. Among [men](#) , Jensen leads by 9, up from a 2-point lead three months ago; among [women](#) , Walz leads by 20, up from a 10-point lead. The gender gap between the two candidates is 29 points, up from 12 points three months ago. Among the 32% of likely voters who say abortion should always be legally permitted, Walz leads by 57 points; among the 26% who say abortion should be legally permitted with some restrictions, Walz leads by 12. 1 in 4 voters say abortion should only be legal in cases of rape, incest, or to save a mother's life; Jensen leads by 35 points among that group; among the 11% of Minnesota likely voters who say abortion should always be illegal, Jensen leads by 39. These numbers are broadly similar across each matchup. Geographically, Walz has gained ground across the state: in the greater Twin Cities area, Walz had led by 15 points, now leads by 17; in Southern Minnesota, Walz had led by 4, now leads by 11. In Western Minnesota, Jensen had led by 26, now leads by 22; in the northeastern part of the state, Jensen had led by 12, now leads by 9. Walz has also gained 2 points against State Senator Paul Gazelka . Walz had led by 5, now leads by 7, 43% to 36%. Again a significant gender gap: Women back Walz by 19 points, men back Gazelka by 6, a 25-point gap, and an increase from 10 points in February. Gazelka leads by 24 points among the 14% of voters who say crime is the most important issue, significantly better than his fellow Republicans. Walz leads former Hennepin County Sheriff Rich Stanek by 10 points, 47% to 37%. Stanek, who had not yet entered the race when SurveyUSA last polled, runs strongly among voters age 50 to 64, where he takes 50%, more than any other Republican. Mike Murphy , the mayor of Lexington, also trails Walz by 10 points, taking 35% to Walz's 45%, as does physician Neil Shah , who sees 34% versus 44% for Walz. Shah, notably, is the one candidate who has narrowed the difference between himself and the incumbent, albeit by a single point; last month, Shah trailed by 11. Business executive Kendall Qualls has given up the most ground since the previous poll; in February, Qualls trailed Walz by 8 points; today, Qualls trails by 12, with Walz taking 46% in a vote today, Qualls 34%. Net Favorability is calculated by subtracting unfavorable ratings from favorable ratings. While Tim Walz's net favorability rating has declined 5 points, from Plus 8 in February to Plus 3 today, Walz remains the best-known candidate with the highest net favorability & and today, for the first time since SurveyUSA began tracking candidate favorability, Walz is the only candidate with a positive Net Favorability. Candidate names were shown to respondents in random order, ranked here from highest to lowest net favorability: Plus 3 Tim Walz. 44% have a favorable opinion, 41% an unfavorable opinion; 11% are neutral; 3% have no opinion. Minus 1 Scott Jensen. 17% favorable, 18% unfavorable; 26% neutral, 39% no opinion. Down 7 points from [3 months ago](#) , when Jensen was at Plus 6. Minus 1 Kendall Qualls. 12% favorable, 13% unfavorable; 29% neutral, 46% no opinion. Qualls is the only candidate whose net favorability has improved since the previous poll, when he was at Minus 4. Minus 5 Rich Stanek. 11% favorable, 16% unfavorable; 32% neutral, 41% no opinion. This is Stanek's first appearance in the poll. Minus 7 Paul Gazelka. 14% favorable, 21% unfavorable; 25% neutral, 41% no opinion. Unchanged from February. Minus 7 Mike Murphy. 8% favorable, 15% unfavorable; 27% neutral, 50% with no opinion. Down 3 points from February. Minus 10 Neil Shah. 6% favorable, 16% unfavorable; 26% neutral, 52% no opinion. Down 3 points from the previous poll. Full results follow...

**About the Research / Filtering:** SurveyUSA interviewed a representative cross-section of 725 Minnesota adults online 05/05/22 through 05/10/22, using sample provided by Lucid Holdings LLC of New Orleans. Of the adults, 629 were registered to vote. Of the registered voters, 513 were identified by SurveyUSA as being likely to vote in the November 2022 general election and were asked the questions which follow. The pool of adult survey respondents was weighted to US Census targets for gender, age, race, education, and home ownership.

**Statement of Methodology:** SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to [editor@surveyusa.com](mailto:editor@surveyusa.com).
