## 1 Week Out, Republican Brad Finstad Has Advantage Over DFL's Jeff Ettinger in Minnesota 1st Congressional District Special Election:

Minnesota's competitive first Congressional District, vacant since the February death of Republican Jim Hagedorn, appears poised to once again be represented by a Republican, according to SurveyUSA's latest polling for ABC 6 News in Rochester.

Today, it's Republican Brad Finstad, a former state representative and former USDA official, at 46%; DFL candidate Jeff Ettinger, the retired CEO of Hormel Foods, is at 38%. 7% say they will vote for some other candidate; 8% say they are undecided. The winner of the special election will serve out the the remainder of Hagedorn's term and face voters again in November.

Among men, Finstad leads by 21 points; among women, Ettinger leads by 5 &ndash; a 26-point gender gap. Finstad leads by 13 to 14 points among voters under age 64, but the race is even among voters 65+. 85% of Republicans vote for Finstad, 87% of Democrats for Ettinger; independents lean to Finstad, 39% to 31%.

16% of voters tell SurveyUSA they have already returned their ballots; Ettinger leads by 13 points among these early voters. Among the 60% of likely voters who tell SurveyUSA they are absolutely certain they will vote, Finstad leads by 14 points. 1 in 4 voters say they will "probably" vote; Finstad lead by 8 among these probable voters.

On the issues, among voters who say candidates' views on the economy will be very important when deciding how they will vote &ndash;; 75% of likely voters &ndash;; Finstad leads by 25 points, 55% to 30%. Among those who say the candidates' views on gun laws will be very important, &frac23; of the electorate, Finstad leads by 4. Those who say candidates' views on abortion will be very important, 59% of voters, narrowly prefer Ettinger, 44% to 40%. Among those who say the candidates' views on COVID-19 will be very important, 39% of likely voters, Ettinger leads by a 20-point margin.

26% of voters say they are following the House Select Committee's January 6 hearings very closely, 30% somewhat closely, 22% not very closely; 21% say they aren't following the hearings at all. Among those who are following the hearings, 38% say the hearings will have a major impact on how they will vote in the special election; those voters back Ettinger by a 44-point margin, 66% to 22%. 24% say the hearings will have a minor impact on their vote; those voters support Ettinger by 10 points, 50% to 40%. 36% of those watching the hearings say they will have no impact on their vote; those voters prefer Finstad, 52% to 31%.

**About the Poll / Filtering:** SurveyUSA interviewed 800 adults from Minnesota's First Congressional District 07/26/22 through 07/30/22. Of the adults, 704 were identified as being registered to vote; of the registered voters, 544 were determined by SurveyUSA to be likely to vote in the August 9 special election, or to have already cast their ballot. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (51% of likely voters) were interviewed on their home telephone in the recorded voice of a professional announcer, using telephone sample of registered voters purchased from Aristotle in Washington DC. Respondents unreachable on a landline telephone (49% of likely voters) were shown the survey questions on the display of their smartphone, laptop or tablet, using online adult panelists chosen randomly by Lucid Holdings LLC of New Orleans. The combined pool of survey respondents was weighted to US Census targets for gender, age, race, and home ownership.

**Statement of Methodology:** SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to [editor@surveyusa.com](mailto:editor@surveyusa.com).
