DFL Incumbent Craig Running 2 Pts. Ahead of Kamala Harris in MN-02 Re-Election Bid; GOP Challenger Teirab Running 4 Pts. Behind Trump:

Incumbent US House of Representatives Member Angie Craig today defeats attorney Joe Teirab 49% to 41%, according to SurveyUSA's latest polling for KSTP-TV in Minneapolis. 3% of likely voters cast their ballots for independent Tom Bowman; 7% are undecided.

Craig is outperforming and Teirab is underperforming the candidates at the top of their respective tickets: in MN-02 Presidential balloting, Vice President Kamala Harris leads former President Donald Trump by just 2 points, 47% to 45%, with 3% choosing other candidates and 5% undecided. In 2020, Joe Biden defeated Trump by a 7-point margin in the current 2nd Congressional District. 93% of those voting for Harris also vote for Craig; 3% cross over and vote for Teirab. 83% of those voting for Trump also vote for Teirab; 7% cross over to vote for Craig, and 5% vote for Bowman, a conservative activist. Among those who tell SurveyUSA they have already cast their ballots, Harris leads Trump by 52 points and Craig leads Teirab by 59. Among those who say they are certain to vote, Harris leads by 4 points, Craig by 2. Among those who say they will probably vote, Trump leads by 18 points, Teirab by 3.

In the Presidential contest, Trump leads by 5 points among men, while Harris leads by 9 among women – a 14-point gender gap. Trump wins voters under age 50 by 12 points; Harris wins those over age 50 by 15 points. Trump holds commanding leads among those voters most concerned with immigration (80 points), those focused on taxes (46 points), and those who say inflation is the most important issue (33 points). Harris holds similarly strong leads among those who say healthcare is the top issue (75 points), those focused on gun control (61 points), and those concerned about abortion (55 points). Harris has a slight 2-point edge among those who cite jobs and the economy as the most important issue.

In the House race, the issues break down similarly, with Teirab up 61 points with immigration voters, 38 points among those focused on taxes, and 23 points among those who say inflation is most important. Craig leads by 79 points among those who say healthcare is the most important issue, by 53 points among those focused on gun control, and by 57 points among those who say abortion is most important. Among those voters who say jobs and the economy is most important, Craig leads by 11 points.

Craig has a net favorability rating of +19, with 47% having a favorable opinion of her and 28% an unfavorable opinion. 18% are neutral; 7% have no opinion. Teirab's net favorability rating is +2: 29% favorable, 27% unfavorable. 26% say they have a neutral opinion of him; 18% have no opinion.

8 in 10 voters say they have seen campaign ads for at least one of the two major candidates in the race, and among those who have seen ads, just 12% say those ads will have a major impact on how they will vote (14% for Craig voters, 10% for Teirab voters.) 31% say the ads will have a minor impact (33% among Craig voters, 24% among Teirab voters). The majority, 57%, say the ads will have no impact in how they vote (66% for Teirab voters, 52% for Craig voters).

Fully crosstabbed results follow ...

About the Research / Filtering: SurveyUSA interviewed 700 adults from Minnesota's 2nd Congressional District 10/07/24 through 10/13/24. Of the adults, 622 were identified as being registered to vote; of the registered voters, 556 were determined by SurveyUSA to be likely to vote in the November general election. This research was conducted using blended sample, mixed mode. 65% of likely voters were shown the survey questions on the display of their smartphone, laptop or tablet, using nonprobability sample of online adult panelists chosen randomly by Cint/Lucid Holdings LLC of New Orleans. The other 35% of likely voters were interviewed on their landline telephones in the recorded voice of a professional announcer, using probability-based telephone sample of registered voters purchased from Aristotle in Washington DC: The combined pool of survey respondents was weighted to US Census 2022 ACS targets for gender, age, race, education, and home ownership, and to recalled 2020 Presidential vote.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
