6 The Minnesota Supreme Court ruled recently that a quorum to conduct business in the Minnesota House of Representatives is 68 members out of the 134 members called for in the Minnesota Constitution. House Republicans say a quorum is the majority of currently elected members, which is now 67 of 133.

 Who do you agree with? The Minnesota Supreme Court decision that a quorum is 68 of the full 134 seats? Or the State House Republican argument that a quorum is 67 of the 133 currently filled seats?

6 The Minnesota Supreme Court ruled recently that a quorum to conduct business in the Minnesota House of Representatives is 68 members out of the 134 members called for in the Minnesota Constitution. House Republicans say a quorum is the majority of currently elected members, which is now 67 of 133.

 Who do you agree with? The Minnesota Supreme Court decision that a quorum is 68 of the full 134 seats? Or the State House Republican argument that a quorum is 67 of the 133 currently filled seats?

7 Until a judge ruled that a DFL House candidate who had won his election could not take office because he did not actually live in his district, it appeared the two parties would be tied 67 to 67 in the House, and Republicans and Democrats had agreed to a power-sharing plan.

 Should Republicans stick with that power-sharing agreement even though they now have a 67 to 66 majority until the special election in March?

Before the state Supreme Court ruled a quorum required 68 members, the 67 House Republicans elected a Speaker and began conducting business. DFL members have been boycotting these sessions. DFL members say they have been working in their districts but not attending the sessions that they say aren't legitimate.

Should the DFL House members who are boycotting the 2025 session so far continue to receive their salaries for being legislators?

16 President Trump granted pardons to all of the 1,500 people charged in the January 6th, 2021 events at the US Capitol. Which of the following do you most agree with? All 1,500 people should have been pardoned? Cases should have been reviewed individually? Or none of the 1,500 people should have been pardoned?

17 President Trump has called for an end to the practice known as "Birthright Citizenship," the longstanding practice from the 14th Amendment of the US Constitution where a child born in the United States is automatically determined to be a US Citizen, regardless of the immigration status of their parents.

Do you believe that the practice of "Birthright Citizenship" should be restricted?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
